

Proposed web-app for PTC project

Samuel Bharti

Ph.D. Student – Biomedical Engineering

Web-application made using R Shiny

- Objective: To present and communicate analysis results in an intuitive and interactive way.
- Make results and analysis more reproducible
- Aids in Open Data Sharing policy

Proposed Pages/Sections

Pediatric Thyroid Cancer Explorer

Home

By Gene

Oncoplot

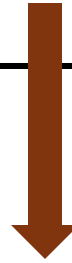

DEGs

RNA Fusions

Genomic Analysis

Download

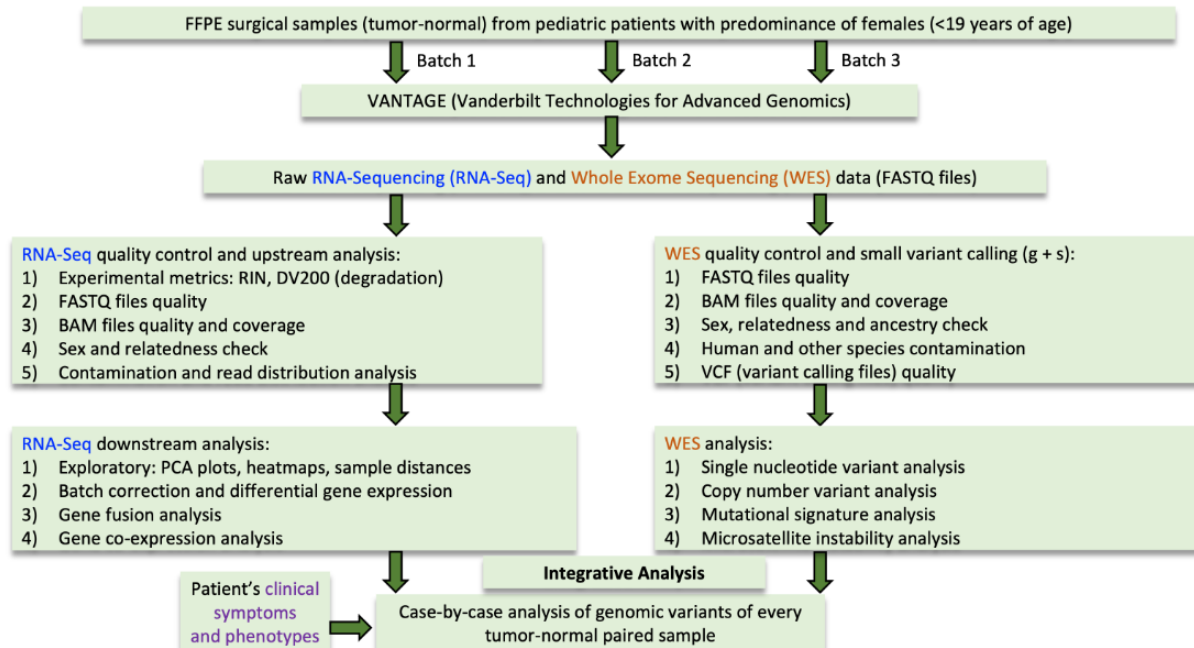

Docs

Project Overview

- Some project introduction information here.

Study Design

Summary Statistics on samples available and used in analysis.

Docs

Gene Dropdown here

Gene Annotation here
Description, function, etc.

Some other high level information

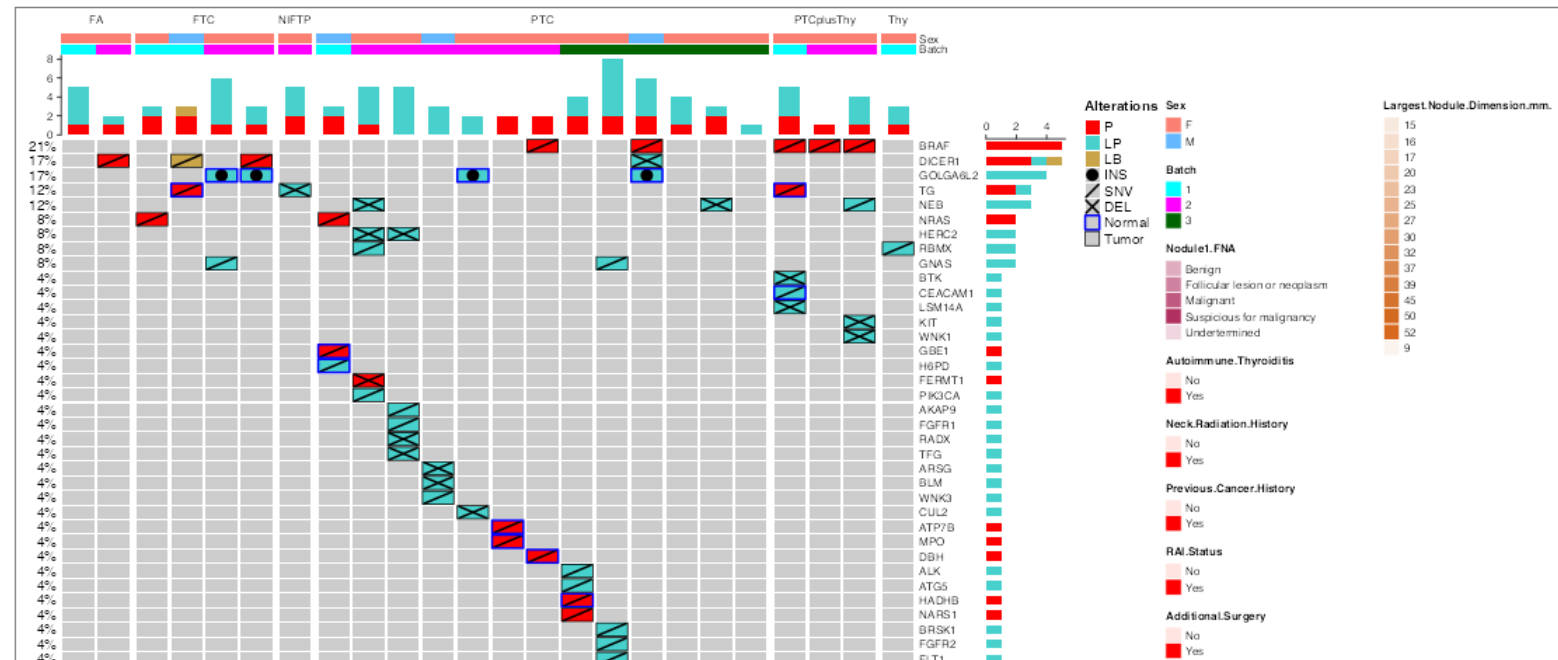

Genomic Analysis

DEG Analysis

RNA-Fusion

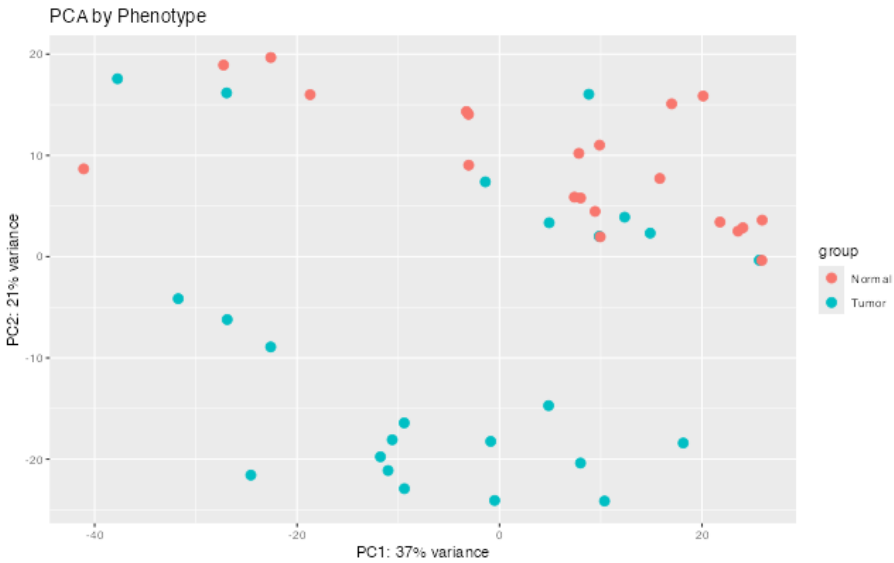

Interactive Oncoplot

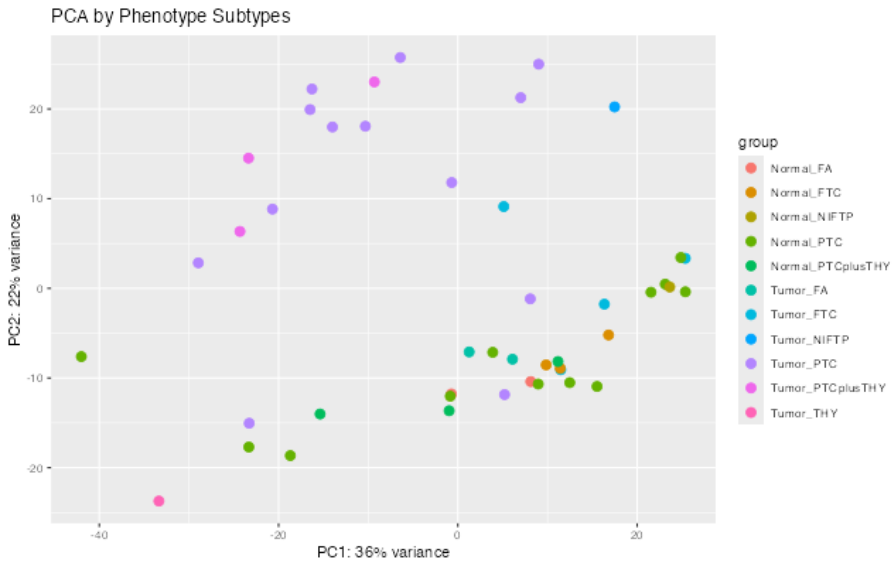

PCA plots of samples in contrast

All Samples: Tumor Vs Normal

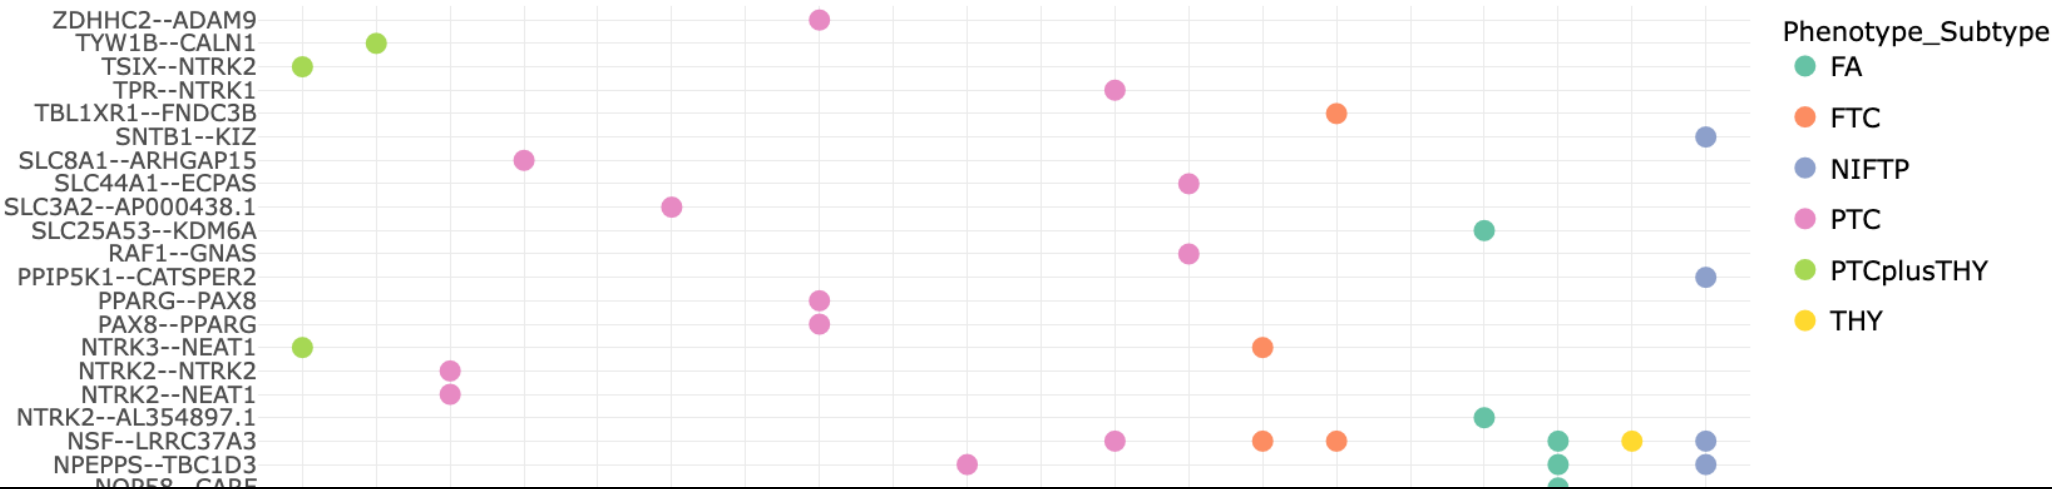

Tumor Samples: PTCplusThy vs FTC

RNA-Fusion Analysis

Gene Fusions by Participant, Grouped by Phenotype Subtype
